

ADAN FRANCE E. CRUZ

Software Engineer | Team Lead | AI-Augmented & Agentic Development

Mabalacat City, Pampanga, Philippines | +63 919 001 5807 | adan.france.cruz@gmail.com | linkedin.com/in/adan-france-cruz

PROFESSIONAL SUMMARY

Software Engineer and Team Lead with nearly a decade of experience (9+ years) building scalable web applications and backend systems across healthcare, automotive, and e-commerce domains. Early adopter of AI-augmented and agentic development workflows, integrating agentic coding tools into daily engineering practice — from feature implementation and debugging to code review and team processes. Skilled in PHP, Laravel, Symfony, REST and GraphQL APIs, and third-party integrations, with a strong record of leading agile teams, owning technical direction, and mentoring developers into mid-level roles.

TECHNICAL SKILLS

AI & Agentic Development: Claude & Claude Code (Agentic Coding Workflows), GitHub Copilot, Codex, AI-Assisted Code Review & Debugging, Prompt Engineering, LLM Evaluation (incl. local/self-hosted models via Ollama), AI Tooling Adoption & Team Enablement

Languages & Frameworks: PHP (Advanced), Laravel, Symfony, CodeIgniter, C#/.NET, JavaScript, React.js, Next.js, Vue.js, AngularJS, jQuery

APIs & Integrations: REST APIs, GraphQL, Webhooks, Payment Gateway Integration (NMI), Third-Party API Integration, Salesforce, Mulesoft

CMS & E-Commerce: WordPress (Custom Plugin & Theme Development), WooCommerce, Elementor

Databases: MySQL, PostgreSQL, MariaDB, Microsoft SQL Server

DevOps & Tools: Docker, AWS, Git, GitHub, GitLab, Bitbucket, TFS, Jira

Practices: Agile/Scrum, Code Review, Technical Hiring, Team Leadership, Developer Mentoring

PROFESSIONAL EXPERIENCE

Software Engineer / Team Lead

Feb 2026 – Present

IronSail

- Lead technical direction and feature architecture for Impetus One, a healthcare platform with e-prescribing, payments, and compliance-sensitive workflows.
- Drive heavy day-to-day use of agentic AI development workflows (Claude Code, GitHub Copilot, Codex), applying agentic coding to feature implementation, debugging, refactoring, and code review.
- Evaluated local/self-hosted LLM options (Ollama) against reliability and compliance requirements for a healthcare production context.
- Advocated for AI-tooling usage and git-based metrics as part of engineering performance measurement.
- Coordinate cross-functionally across frontend, backend, and DevOps teams to plan, scope, and deliver features.
- Designed role-based access controls for DEA credential management between providers and organization admins, and surfaced compliance issues ahead of release.
- Integrated and consulted on the NMI payment gateway (voids, refunds, cancellations) and managed webhook integrations with external partners from sandbox through production.
- Led vendor evaluations, including e-prescribing platforms and two-factor authentication solutions, ahead of product launch.
- Own the technical hiring loop end to end, from resume screening to candidate interviews and hiring recommendations.

Senior Web Developer

Jul 2024 – Nov 2025

Digital Pie

- Designed and implemented scalable APIs and backend services using PHP and MySQL.

- Adopted agentic AI coding workflows into daily development, using AI assistants for scaffolding, refactoring, and code review — an approach carried forward and scaled in subsequent roles.
- Developed custom WordPress plugins and integrations to meet client-specific business needs.
- Led development of dynamic front-end components using Next.js and AngularJS.
- Mentored junior developers and conducted code reviews to maintain high-quality standards.
- Collaborated with cross-functional teams to deliver end-to-end solutions.

Team Lead & Senior Backend Developer

Nov 2021 – Jun 2024

Inchcape Digital

- Led a team of 5+ developers delivering backend solutions for international automotive e-commerce platforms.
- Developed APIs using Symfony and GraphQL, integrating third-party services for listings, promotions, insurance, and payments.
- Collaborated with frontend, Mulesoft, and Salesforce teams to ensure seamless integration.
- Optimized backend workflows, reducing processing time by 20%.
- Mentored junior developers and fostered a culture of continuous learning.

IT Analyst II

Jan 2020 – Oct 2021

RMS Collect Phils Inc (IQOR)

- Developed and maintained APIs and backend systems using C#/.NET and Microsoft SQL Server, supporting process automation and efficiency improvements.
- Maintained and enhanced existing systems using C#, JavaScript, Vue.js, React, and Next.js.

Junior Full Stack Developer

Jul 2018 – Dec 2019

Shore 360 Inc

- Delivered client-facing projects, providing direct technical support and solution presentations.
- Led development of a standalone project while contributing to collaborative systems using Laravel, Bootstrap, jQuery, and React.
- Proposed and implemented automation and security improvements; performed code reviews and QA testing.

Web Developer

Jun 2017 – Jun 2018

Nextvation

- Developed e-commerce platforms using Laravel and WordPress (WooCommerce), including custom themes and plugins.
- Maintained and improved client APIs and led a small group of junior developers to deliver project modules.

KEY ACHIEVEMENTS

- Improved API performance and reduced response times by up to 35%.
- Mentored 6+ junior developers who progressed to mid-level positions.
- Consistently led teams delivering mission-critical projects on time and within budget.

EDUCATION

Bachelor of Science in Information Technology

Mabalacat City College

- Best Capstone Awardee; President's Lister & Dean's Lister; multiple intra- and inter-school Quiz Bee Champion.

CERTIFICATIONS & TRAINING

- Google Project Management Specialization – Coursera (Aug 2023)
- DDI Leadership Training – Inchcape DDCP (Nov 2023)
- DevCon Summit (Jun 2019)
